

**CMN Managing With Care™**

## **News Release**

### **CMN Inc. Expands Technology with Robust EDI Capabilities**

Toronto, January 2, 2006 – CMN is pleased to announce that they have significantly expanded their technological capabilities through the implementation of EDI Enterprise, and are now fully EDI compliant. EDI Enterprise is a new suite of software programs designed to allow for the import and export of HIPAA Compliant 837 institutional and professional medical claims into the CMN Enterprise Case and Claims Management system.

The implementation of this new software is a significant step forward, as it allows CMN to accept claims electronically via EDI, which will increase efficiencies in the claims processing, repricing, and adjudication process, and in turn significantly reduce the turn around time for claims payment. Additionally, if CMN is required to go outside of its own world-class proprietary network, the software allows CMN to quickly reprice claims with EDI connections at leading U.S. PPO's. Finally, through a unique partnership with a keying vendor, CMN is overnight able to convert paper health claims into an EDI file ready for processing.

“CMN is very committed to providing value added services and solutions to our clients and partners. By implementing EDI, we will improve our speed and accuracy for claims repricing. This is another step to increase the sophistication and capabilities of CMN to provide the best cost containment to our clients” says Alex Kroon, COO, CMN Inc.
